URNCST Journal Mentored Paper Competition

Funded by the
Government
of Canada

About the URNCST Journal Mentored Paper Competition

In an effort to provide undergraduate students the opportunity to contribute to STEM research literature in our novel Mentored Paper. Students that have been selected will have the opportunity to be partnered with a graduate student as they write a paper that is of publishable quality. The topic of the paper will be in the graduate student's area of expertise to allow them to more effectively guide the students throughout the writing process. Students will be mentored from the design stage to write up, and the final paper will be peer-reviewed by another graduate student, to allow the students to experience external-feedback. This opportunity provides undergraduate students the chance to improve their scientific writings skills and go through the entire process of writing an academic paper, while working under the supervision of a graduate student.

Eligibility: Students enrolled in an undergraduate (i.e. life sciences, biology, chemistry, etc.) or professional-undergraduate (i.e. medicine, pharmacy, nursing, etc.) degree program.

What are the benefits of participating?

- Authors submitting abstracts deemed to be of high quality will be **invited to write a full-length research protocol or review** based on their submission topic. This provides students interested in advancing their career in research with the opportunity to experience peer-review and publication.
