“Research in Earnest”

## CALL FOR RESEARCH ABSTRACTS

### URN CST Journal Research Methods Primer

Funded by the  
Government  
of Canada

### About the URN CST Journal Research Methods Primer

Learning and understanding the methods used to conduct high-quality, rigorous research is imperative to an undergraduate researcher's success as a future scientist. The URN CST Journal team prides itself on its commitment to advocate for undergraduate STEM research. In our endeavours to promote undergraduate research, we have launched an initiative, the URN CST Journal Research Methods Primer, which has been specifically designed to provide undergraduate researchers with the opportunity to gain a deeper understanding of a commonly used scientific research method of their choosing. Students selected to participate will be presented with the opportunity to be partnered with a graduate student mentor to learn about a research methodology in detail, and subsequently co-draft a research methods primer manuscript for publication in the URN CST Journal.

**Eligibility:** Students enrolled in an undergraduate (i.e. life sciences, biology, chemistry, etc.) or professional-undergraduate (i.e. medicine, pharmacy, nursing, etc.) degree program.

#### What are the benefits of participating?

- Authors submitting abstracts deemed to be of high quality will be **invited to write a full-length research methods primer** based on their submission topic. This provides students interested in advancing their career in research with the opportunity to experience peer-review and publication.

**Learn More About the Competition and Submit YOUR Abstract:**
